Summary of 161.35.182.42:443 (HTTPS) SSL Security Test

Provided "as is" without any warranty of any kind.

161.35.182.42 was tested 1 time during the last 12 months.

Your final score:

A
B
C
F

B-

Date/Time:	Mar 10th, 2025 00:59:26 GMT+0
Source IP/Port:	161.35.182.42:443
Type:	HTTPS

Compliance Test	Compliance Test	Compliance Test	Industry Best Practices	External Content Security
NO MAJOR ISSUES FOUND	2 ISSUES FOUND	2 ISSUES FOUND	NO MAJOR ISSUES FOUND	NOT FOUND

The SSL certificate is untrusted. Modern browsers will display a security warning message to all website visitors. Review and remediate highlighted issues.	Non-compliant with PCI DSS requirements

The server supports the most recent and secure TLS protocol version of TLS 1.3.	Good configuration

Full Test Results: https://www.immuniweb.com/ssl/161.35.182.42/NYVM5Dq6/

SSL Certificate Analysis

RSA CERTIFICATE INFORMATION

Issuer	-
Trusted	No Untrusted Reasons The certificate is self-signed The certificate has been signed by an unknown Certificate Authority (CA)
Common Name	161.35.182.42
Key Type/Size	RSA 3072 bits
Weak Key (Debian)	Secure
Serial Number	0x12E5D9201119E1F1016E742E98BEDE7CBD647B82
Signature Algorithm	sha256WithRSAEncryption Strong
Transparency	No
Validation Level	No
OCSP Must-Staple	No
Supports OCSP Stapling	No
Revocation status	Good
Valid From	March 10, 2025 01:54 CET
Valid To	March 10, 2026 01:54 CET

CERTIFICATE CHAIN

Server certificate	**161.35.182.42**
Type/Size	RSA 3072 bits
Serial Number	0x12E5D9201119E1F1016E742E98BEDE7CBD647B82
Signature	sha256WithRSAEncryption Strong
SHA256	6f7f8b536b7896286a... 8cd252346ee5f2ab6e
PIN	CXhQM4Al35UANOUFdX... +y9UK+be5L06Gcds4=
Expires in	365 days
Comment	Self-signed

PCI DSS Compliance Test

Reference: PCI DSS 4.0, Requirement 4.2

CERTIFICATES ARE UNTRUSTED

The RSA SSL certificate provided by the server is untrusted. Review and remediate highlighted issues described in the SSL Certificate section.

Non-compliant with PCI DSS requirements

SUPPORTED CIPHERS

List of all cipher suites supported by the server:

TLSV1.3

TLS_AES_128_GCM_SHA256	Good configuration
TLS_AES_256_GCM_SHA384	Good configuration
TLS_CHACHA20_POLY1305_SHA256	Good configuration

TLSV1.2

TLS_ECDHE_RSA_WITH_AES_256_GCM_SHA384	Good configuration
TLS_ECDHE_RSA_WITH_AES_128_GCM_SHA256	Good configuration
TLS_ECDHE_RSA_WITH_AES_256_CBC_SHA384	Good configuration
TLS_ECDHE_RSA_WITH_AES_128_CBC_SHA256	Good configuration

SUPPORTED PROTOCOLS

List of all SSL/TLS protocols supported by the server:

TLSv1.2	Good configuration
TLSv1.3	Good configuration

Full Test Results: https://www.immuniweb.com/ssl/161.35.182.42/NYVM5Dq6/

SUPPORTED ELLIPTIC CURVES

List of all elliptic curves supported by the server:

P-256 (prime256v1) (256 bits)	Good configuration
P-521 (secp521r1) (521 bits)	Good configuration
P-384 (secp384r1) (384 bits)	Good configuration
X25519 (253 bits)	Good configuration
X448 (448 bits)	Good configuration

POODLE OVER TLS

The server is not vulnerable to POODLE over TLS. **Not vulnerable**

GOLDENDOODLE

The server is not vulnerable to GOLDENDOODLE. **Not vulnerable**

ZOMBIE POODLE

The server is not vulnerable to Zombie POODLE. **Not vulnerable**

SLEEPING POODLE

The server is not vulnerable to Sleeping POODLE. **Not vulnerable**

0-LENGTH OPENSSL

The server is not vulnerable 0-Length OpenSSL. **Not vulnerable**

CVE-2016-2107

The server is not vulnerable to CVE-2016-2107. **Not vulnerable**

Full Test Results: https://www.immuniweb.com/ssl/161.35.182.42/NYVM5Dq6/

SERVER DOES NOT SUPPORT CLIENT-INITIATED INSECURE RENEGOTIATION

The server does not support client-initiated insecure renegotiation.

Good configuration

ROBOT

The server is not vulnerable to ROBOT vulnerability.

Not vulnerable

MARVIN ATTACK

The system is not vulnerable to the Marvin Attack, as no TLS_RSA cipher suites using PKCS#1 v1.5 are enabled.

Not vulnerable

HEARTBLEED

The server version of OpenSSL is not vulnerable to Heartbleed attack.

Not vulnerable

CVE-2014-0224

The server is not vulnerable to CCS Injection.

Not vulnerable

CVE-2021-3449

The server is not vulnerable to CVE-2021-3449 (OpenSSL Maliciously Crafted Renegotiation Vulnerability).

Not vulnerable

This document is intellectual property of ImmuniWeb SA and must never be used for any commercial purposes without express written permission. Please report any violations to info@immuniweb.com

HIPAA and NIST Compliance Test

Reference: HIPAA, Security Rule (Ref. NIST SP 800-52: "Guidelines for the Selection and Use of TLS Implementations")

X.509 CERTIFICATES ARE IN VERSION 3

All the X509 certificates provided by the server are in version 3.

Good configuration

CERTIFICATES ARE SELF-SIGNED

The RSA certificate provided by the server is self-signed. Modern browsers will display a security warning message to all website visitors. Acquire a new certificate from a trusted Certificate Authority (CA).

Non-compliant with NIST guidelines

CERTIFICATES DO NOT PROVIDE REVOCATION INFORMATION

Your RSA certificate does not provide revocation information. Acquire a new certificate from a trusted Certificate Authority (CA).

Non-compliant with NIST guidelines

SUPPORTED CIPHERS

List of all cipher suites supported by the server:

TLSV1.3

TLS_AES_128_GCM_SHA256	Good configuration
TLS_AES_256_GCM_SHA384	Good configuration
TLS_CHACHA20_POLY1305_SHA256	Good configuration

TLSV1.2

TLS_ECDHE_RSA_WITH_AES_256_GCM_SHA384	Good configuration
TLS_ECDHE_RSA_WITH_AES_128_GCM_SHA256	Good configuration

Full Test Results: https://www.immuniweb.com/ssl/161.35.182.42/NYVM5Dq6/

This document is intellectual property of ImmuniWeb SA and must never be used for any commercial purposes without express written permission. Please report any violations to info@immuniweb.com

Copyright © 2024 ImmuniWeb SA

TLS_ECDHE_RSA_WITH_AES_256_CBC_SHA384	Good configuration
TLS_ECDHE_RSA_WITH_AES_128_CBC_SHA256	Good configuration

SUPPORTED PROTOCOLS

List of all SSL/TLS protocols supported by the server:

TLSv1.2	Good configuration
TLSv1.3	Good configuration

SUPPORTED ELLIPTIC CURVES

List of all elliptic curves supported by the server:

P-256 (prime256v1) (256 bits)	Good configuration
P-521 (secp521r1) (521 bits)	Good configuration
P-384 (secp384r1) (384 bits)	Good configuration
X25519 (253 bits)	Good configuration
X448 (448 bits)	Good configuration

SERVER DOES NOT SUPPORT SERVER NAME INDICATION

The server does not support Server Name Indication (SNI) extension for TLS versions ≤1.3. SNI allows a user to specify the domain name it's trying to connect to, and prevents common name mismatch errors, when a server hosts several domains with different SSL certificates.

Information

EC_POINT_FORMAT EXTENSION

The server supports the EC_POINT_FORMAT TLS extension.

Good configuration

Full Test Results: https://www.immuniweb.com/ssl/161.35.182.42/NYVM5Dq6/

Industry Best Practices Test

CERTIFICATES HAVE A VALIDITY PERIOD OF 398 DAYS OR LESS

All the server certificates provided have been validated for less than 398 days (13 months).

Good configuration

CERTIFICATES DO NOT PROVIDE EV

The RSA certificate provided is NOT an Extended Validation (EV) certificate.

Information

TLS 1.3 SUPPORTED

The server supports TLS 1.3 which is the only version of TLS that currently has no known flaws or exploitable weaknesses.

Good configuration

TLS 1.3 EARLY DATA (0-RTT)

Server's TLS 1.3 Early Data (RFC 8446, page 17) is not enabled.

Information

SERVER HAS CIPHER PREFERENCE

The server enforces cipher suites preference.

Good configuration

SERVER PREFERRED CIPHER SUITES

Preferred cipher suite for each protocol supported (except SSLv2). Expected configuration are ciphers allowed by PCI DSS and enabling PFS:

TLSv1.2 TLS_ECDHE_RSA_WITH_AES_256_GCM_SHA384 Good configuration

TLSv1.3 TLS_AES_128_GCM_SHA256 Good configuration

SERVER PREFERS CIPHER SUITES PROVIDING PFS

Full Test Results: https://www.immuniweb.com/ssl/161.35.182.42/NYVM5Dq6/

This document is intellectual property of ImmuniWeb SA and must never be used for any commercial purposes without express written permission. Please report any violations to info@immuniweb.com

Copyright © 2024 ImmuniWeb SA

For TLS family of protocols, the server prefers cipher suite(s) providing Perfect Forward Secrecy (PFS).

Good configuration

ALWAYS-ON SSL

The HTTP version of the website redirects to the HTTPS version.

Good configuration

SERVER DOES NOT PROVIDE HSTS

The server does not enforce HTTP Strict Transport Security. We advise to enable it to enforce the user to browse the website in HTTPS.

Misconfiguration or weakness

HSTS PRELOAD

This domain does not support HSTS Preload, which means it may not enforce HTTPS connections strictly and could be more vulnerable to security threats like protocol downgrade attacks.

Information

TLS_FALLBACK_SCSV

The server supports TLS_FALLBACK_SCSV extension for protocol downgrade attack prevention.

Good configuration

SERVER DOES NOT SUPPORT CLIENT-INITIATED SECURE RENEGOTIATION

The server does not support client-initiated secure renegotiation.

Good configuration

SERVER-INITIATED SECURE RENEGOTIATION

The server supports secure server-initiated renegotiation.

Good configuration

SERVER DOES NOT SUPPORT TLS COMPRESSION

TLS compression is not supported by the server.

Good configuration
